THE BEST AT HOME

Accessories & Finishing Touches

Complete your outdoor space

The details that make a space yours.

Close off one or more sides and enjoy the outdoors all year round. From elegant louvres and versatile Grillo panels to high-quality polycarbonate and glass side walls.

Soften the light and add privacy with integrated Screens, or create a clear, sheltered partition with the Windbreaker.

Every accessory is designed to integrate seamlessly with your Deponti veranda or louvered roof — completing the picture.

Discover outdoor living, beautifully reimagined by Deponti. Manufacturers and designers of verandas and related products, focused on building valuable partnerships.

Screens

Calm, shelter and control

With the Screens within the Pinela Series, a new dimension of comfort is created. They soften the light, reduce the wind and provide privacy without losing the connection to the outdoors. Perfectly balanced with the architecture of the outdoor space.

Screens

For those who do not leave comfort to chance. For those who value every detail.

When the sun is high, the Screens filter daylight into a pleasant glow. No harsh contrast, but a gentle transition between inside and outside. When evening falls or the wind rises, they subtly enclose the space. Moving silently, with smooth and effortless control.

The housing integrates seamlessly with the frame. The anthracite coloured fabric radiates calm, both on the inside and the outside. The result: a fully integrated solution for the moments when the sun is welcome, just slightly softer.

DETAILS	
Application	Pinela Glass, Pinela Deluxe Plus, Pinela Delight, Pinela Tilt
Frame colours	RAL9016 textured / RAL7024 textured / RAL9005 textured

THE BEST AT HOME

Windbreaker

Wind or no wind. Bad weather or good weather. Maintain a view as clear as glass. Experience the outdoors with our unique Windbreaker, featuring our vertical sliding technology.

Perfect for terraces. Ideal for creating a partition. Thanks to our innovative Windbreaker, we make outdoor living even more attractive.

In addition, you can expand the Windbreaker with a base that can also function as a planter. The base eliminates the need for screws in the ground and creates an immediate green environment.

The base (with or without a planter) is optionally available with wheels, making the Windbreaker easily movable and versatile for use in any location.

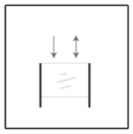

DEPONTI

The base and wheels are supplied in black. These can be easily mounted under the Windbreaker. The planter is supplied in the same colour as the Windbreaker.

Easy to use
With a click, the vertical sliding system opens easily. A screen rises and extends with gentle speed. With the same simple movement you can click and lower the screen again.

Without power
Because operation is manual, no electricity is needed. Installation is easy, you just set it level and in the direction you want.

Minimalist partition
Thanks to its minimalist design you can enjoy a view as clear as glass. All profiles are slim in appearance and well concealed.

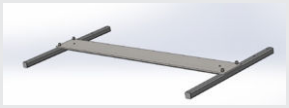

Stable and sturdy unit
Despite the slender appearance, the profiles carry considerable weight. The mounting feet are easy to secure to the surface. In addition, we use 8 millimetres toughened safety glass.

PRODUCT INFORMATION

Retracted height	1100mm
Extended height	1900mm
Available widths	1000mm / 1500mm / 2000mm
